

Technology Advisory, Security and Compliance Services

RSI is well suited to help you proactively plan for core business risks as well as provide incident response if needed. Our security experts can assess how your unique attack surface has evolved over time and whether your Cybersecurity planning and mitigation strategies have kept pace. Focus on the strategies and logistics that drive your future, and let us focus on keeping you secure.

Since 2008, RSI has helped organizations of all sizes achieve risk-management success and protected our customer's critical assets and reputation. Let's talk about how we can confront this evolving threat landscape together, and walk away confident you've met a business and technology partner that deeply understands your company's needs.

Managed Firewall and UTM

An all inclusive security firewall is essential to deliver visibility into regulatory compliance standards, allowing for strict access controls and data leakage audits.

Threat and Vulnerability Management

RSI continuously identifies, classifies and monitors all potential targets of Cybersecurity attacks in your organization. By deploying patches to fix identified vulnerabilities, we greatly narrow the attack surface.

Managed Endpoint Security

RSI provides world-class service to ensure that all the devices connected to your network are deployed with your latest risk management policy, offering comprehensive coverage against a vast spectrum of threats.

Managed Network Services

RSI provides 24/7 network and IT infrastructure monitoring. A full suite of services considerably minimizes equipment downtime and alerts are automatically generated to prevent any interruption in business.

Managed Incident Response

Rely on an emergency response team that is available to provide on-site and remote investigation of incidents, mitigating the impact of attacks and restoring business.

Backup & Recovery Services

We offer a full range of storage and recovery services that can protect your critical data. These can be either cloud or on premise services.

Managed Compliance Policy Services

Our managed compliance policy services will walk you through the process of creating a flexible, sustainable and effective risk and compliance program.

Identity and Access Management

RSI can help your organization implement security protocols that limit data access without impeding productivity. This allows for fine-grained management of access control.

IT Support/Helpdesk

RSI provides multiple ways for customers to troubleshoot problems by offering assistance through our call center 24/7 or through our self-serve knowledge base.

Identification

Identification services provide control and protocols for managing Cybersecurity. At RSI, we have management tools that capture, track, and compare a client's Cybersecurity asset inventory with their risk tolerance for clients of any size (Tier 1-4).

Protection

RSI offers many IT services that range from simple IT helpdesk support to Cybersecurity and forensics. We understand the importance of setting up an end users' IT network with the adequate security measures and software that will provide them with the highest level of protection for their individual IT setup.

Detection

In the event that a RSI client experiences any form of an intrusion or breach to their endpoint system, we have the ability to detect any adverse or negative Cybersecurity events, determine if our protective solutions have successfully mitigated the matter, and notify the client.

Response & Recovery

In the confirmed event that a RSI client has experienced a security breach, RSI can and will support and advise them through the Incident Response lifecycle. If the breach is complex, and requires additional services (AD Hoc services), RSI will provide the client with our base support and guidance services and provide the client with an IRP (Incident Response Plan).

About

RSI is the nation's premier information security and compliance provider dedicated to helping organizations achieve risk-management success. We work with some of the world's leading companies, institutions and governments to ensure the safety of their information and their compliance with applicable regulation. We also are a security and compliance software ISV and stay at the forefront of innovative tools to save assessment time, increase compliance and provide additional safeguard assurance. With a unique blend of software based automation and managed services, RSI can assist all sizes of organizations in managing IT governance, risk management and compliance efforts (GRC).
